

Data Cleaning — Work Sample

A real excerpt from a client-style dataset: inconsistent naming, mixed date formats, and missing values — cleaned and standardized.

Before			
CENTER	MONTH	START	END
CENTRE-1	janvier	108	85
Centre 2	46023	106	N/A
CENTRE-3	46023	135	86
centre2	46054	104	39

After			
CENTER	MONTH	START	END
Center 1	Jan 2026	108	85
Center 2	Jan 2026	106	—
Center 3	Jan 2026	135	86
Center 2	Feb 2026	104	39

How I approach every file

1. Audit

Spot inconsistent formats, duplicates, and missing values before touching anything.

2. Standardize

Unify naming, dates, and formatting into one consistent structure.

3. Verify

Cross-check totals and flag remaining gaps instead of guessing.

4. Deliver

Clean file, plus a short summary of exactly what changed.
